

This week's Science lesson is all about the digestive system. In class we made an example of the digestive system using household items. Please watch this short video –

<https://kidshealth.org/en/kids/dsmovie.html#cat20580>

Then label the parts of the digestive system on this diagram –

Can you tell me what are the names of the substances produced in your body that helps to break down food?

---

Where is the most 'moisture' absorbed?

---

What is the main role of your teeth in the process?

---
